

# The GX Series Engines have reliability written all over them.

**H**onda GX Series Engines have long been recognized as the industry leader in providing reliable, easy-starting and fuel efficient small engines. You'll find Honda GX Series overhead valve engines on a wide variety of construction, maintenance and premium power equipment. The rental industry, where power equipment is subjected to the ultimate test of durability, relies heavily on Honda OHV engines to ensure customer satisfaction and a minimal level of maintenance and repair. When it comes to reliability, trust the engines with the Honda name.

## Quality and performance are standard with Honda GX Series engines.

From cast iron cylinder sleeves to Automatic Decompression, Honda offers a variety of power solutions to meet your specific application. Choose from over 60 standard single cylinder engine variations. A variety of features are available, depending on the specific model and application, including four types of air filtration systems and Oil Alert® which warns the user before oil reaches an unsafe operating level. Other options include 2-to-1 and 6-to-1 reduction units, one to 18 amp charging, lamp coils and shaft variations to suit every standard application. For the most current information on Honda engine technologies, visit our website at [www.honda.com](http://www.honda.com).

Environmental responsibility has been an integral part of our product development philosophy years before emission levels were established. In fact, with minor modifications, the same GX Series engine design introduced in 1983 meets today's EPA and CARB emission level standards. Honda's advanced engine technology offers a number of distinct advantages including fuel savings, lower emissions and standardized replacement parts readily available through your local Honda Engines dealer.

## Prove it to yourself.

Next time you visit a rental center, see a landscape truck or pass by a construction site, you'll probably see a Honda GX engine-powered piece of equipment. Stop and ask them what they think of the Honda engine. Chances are they'll tell you they wouldn't use anything else. Sure, you can find a less expensive engine, but you won't find a more reliable one.

The high-efficiency combustion delivered by the OHC configuration helps Honda GX engines certify to all existing CARB and EPA emission standards.
